Subscription Rates 1996

Annual Institutional Subscription Rates 1996: North, Central and South America, U.S.$1557.00, Rest of the World £979.00. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

Single parts are available. Subscription enquiries from customers in North America should be sent to: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A., and for the remainder of the world to: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K. Tel: (01865) 843000; Fax: (01865) 843010.

At the end of the year the Subscriber will receive, free, the annual subject index.

Second class postage paid at Newark, NJ. *Progress in Neurobiology* (ISSN 0301-0082) is published monthly with an additional issue published every second month (February, April, June, August, October, December), by Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK. The annual subscription in the USA is $1557. *Progress in Neurobiology* is distributed by Mercury Airfreight International Ltd, 10 Camptown Road, Irvington, NJ 07111-1105. Postmaster: Please send address corrections to *Progress in Neurobiology* c/o Elsevier Science Inc, 660 White Plains Road, Tarrytown, NY 10591-5153.

AUTHOR INDEX
VOLUMES 25–47 (1985–1995)

Able, K.P. (1994) Magnetic orientation and magnetoreception in birds, **42**, 449–473.
Abrous, N.N. (1994) Dopaminergic neural grafts after fifteen years; results and perspectives, **44**, 1–35.
Adams, R.N. (1990) In vivo electrochemical measurements in the CNS, **35**, 297–311.
Agnati, L.F. (1995) The concept of trophic units in the central nervous system, **46**, 561–57.
Ahnert-Hilger, G. (1985) Molecular aspects of tetanus and botulinum neurotoxin poisoning, **46**, 83–96.
Aitkin, L. (1993) Audition and the auditory pathway of a vocal new world primate, the common marmoset, **41**, 345–367.
Akaike, N. (1994) Proton-induced current in neuronal cells, **43**, 73–83.
Akasu, T. (1995) Synaptic transmission and function of parasympathetic ganglia, **45**, 459–522.
Alcantara, S. (1992) Cell death and removal in the cerebral cortex during development, **39**, 1–43.
Aldrich, M.S. (1993) The neurobiology of narcolepsy-cataplexy, **41**, 533–541.
Alhonen, L.I. (1995) Transgenic animals as models for the study of the neurobiological role of polyamines, **47**, 545–563.
Allen, E.E. (1988) The role of norepinephrine in plasticity of visual cortex, **30**, 171–192.
Altman, J.S. (1995) Modelling the generation of long-term neuronal activity underlying behaviour, **45**, 361–372.
Altman, J. (1987) Directions in neurogenetic gradients and patterns of anatomical connections in the telencephalon, **29**, 57–106.
Ando, K. (1992) Cerebrovascular innervation of small bats, **38**, 483–510.
Angaut, P. (1993) The cerebellar olivo-corticonuclear connections in the rat, **40**, 63–87.
Anniko, M. (1988) Recent advances in inner ear cytochemistry — Microanalytical and immunomorphological investigations, **30**, 209–270.
Ansved, T. (1995) Effects of ageing on the motor unit, **45**, 397–458.
Anwyl, R. (1990) Neurophysiological actions of 5-hydroxytryptamine in the vertebrate nervous system, **35**, 451–468.
Arbogast, L. A. (1989) Neuroendocrine regulation of prolactin release, **33**, 399–447.
Argiolas, A. (1995) Neuromodulation of penile erection; an overview of the role of neurotransmitters and neuropeptides, **47**, 235–255.
Armstrong, W.E. (1995) Morphological and electrophysiological classification of hypothamic supraoptic neurons, **47**, 291–339.
Armstrong, D.M. (1986) Supraspinal contributions to the initiation and control of locomotion in the cat, **26**, 273–361.
Attila, M. (1993) The toad, ugly and venomous, wears yet a precious jewel in his skin, **41**, 473–507.
Audesirk, G. (1985) Effects of lead exposure on the physiology of neurons, **24**, 199–232.
Auladell, C. (1992) Cell death and removal in the cerebral cortex during development, **39**, 1–43.
Azanza, M.J. (1994) Cell membrane biochemistry and neurobiological approach to biomagnetism, **44**, 517–601.

Baev, K.V. (1992) Principles of organization of neural systems controlling automatic movements in animals, **39**, 45–112.
Bagust, J. (1995) The isolated mammalian spinal cord, **46**, 1–48.
Balaban, P. (1993) Behavioral neurobiology of learning in terrestrial snails, **41**, 1–19.
Ball, E.E. (1990) Neuronal organization and information processing in the wind-sensitive cercal receptor/giant interneurone system of the locust and other orthopteroid insects, **35**, 217–243.
Ball, E.E. (1993) The grasshopper, Drosophila and neuronal homology (advantages of the insect nervous system for the neuroscientist), **41**, 657–682.
Banin, E. (1993) Toxic effects of aluminium on nerve cells and synaptic transmission, **40**, 89–121.
Banks, R.W. (1994) The motor innervation of mammalian muscle spindles, **43**, 323–362.
Barde, Y-A. (1994) Neurotrophin receptors, **42**, 347–352.
Barnes, G.R. (1993) Visual-vestibular interaction in the control of head and eye movement: The role of visual feedback and predictive mechanisms, **41**, 435–472.
Barnes, J.M. (1992) Molecular characteristics of excitatory amino acid receptors, **39**, 113–133.
Baum, Z. (1989) Dynamic changes in sodium channels at demyelinated axons, **32**, 159–179.
Bayer, S.A. (1987) Directions in neurogenetic gradients and patterns of anatomical connections in the telencephalon, **29**, 57–106.
Beck, K.D. (1994) Functions of brain-derived neurotrophic factor, insulin-like growth factor-I and basic fibroblast growth factor in the development and maintenance of dopaminergic neurons, **44**, 497–516.
Behbehani, M.M. (1995) Functional characteristics of the midbrain periaqueductal gray. (PAG), **46**, 575–605.
Bell, C. (1988) Dopamine release from sympathetic nerve terminals, **30**, 193–208.
Bell, J. (1994) The structure and function of Pacinian corpuscles; a review, **42**, 79–128.
Bella, S. (1995) The S-100; a protein family in search of a function, **46**, 71–82.
Belousov, A.B. (1993) The study of brain slices from hibernating mammals in vitro and some approaches to the analysis of hibernation problems in vivo, **40**, 123–161.
Ben-Jonathan, N. (1989) Neuroendocrine regulation of prolactin release, **33**, 399–447.
Beninger, R. J. (1990) Dopamine D-1 and D-2 receptors in relation to reward and performance: A case for the D-1 receptor as a primary site of therapeutic action of neuroleptic drugs, **34**, 143–182.
Beninger, R.J. (1991) On the interpretation of

asymmetries of posture and locomotion produced with dopamine agonists in animals with unilateral depletion of striatal dopamine, **36**, 229–256.
Bennett, M.R. (1995) The origin of Gaussian distributions of synaptic potentials, **46**, 331–350.
Bennington, J.H (1994) Does the function of REM sleep concern non-Rem sleep or waking? **44**, 433–449.
Bennington, J. H. (1995) Restoration of brain energy metabolism as the function of sleep, **45**, 347–360.
Benveniste, H. (1990) Microdialysis — theory and application, **35**, 195–215.
Bernath, S. (1992) Calcium-independent release of amino acid neurotransmitters: Fact or artifact? **38**, 57–91.
Bernocchi, G. (1994) CisDDP treatment and development of the rat cerebellum, **42**, 161–196.
Bernroider, G. (1988) Cell-patterning during sexual neurogenesis, **31**, 477–506.
Berry, M.D. (1994) Possible mechanisms of action of Deprenyl and other MAO-B inhibitors of some neurologic and psychiatric disporders, **44**, 141–161.
Berry, M.D. (1994) The functional role of monoamine oxidases A and B in the mammalian central nervous system, **42**, 375–391.
Bertram, E.H. (1991) III. Functional anatomy of hippocampal seizures, **37**, 1–82.
Bigalke, H. (1985) Molecular aspects of tetanus and botulinum neurotoxin poisoning, **46**, 83–96.
Bijak, M. (1995) A physiological role for GABA-B receptors and the effects of baclofen in the mammalian central nervous system, **46**, 423–462.
Bilfinger, T.V. (1994) The immune-neuro-link and the macrophage: Postcardiotomy delirium, HIV-associated dementia and psychiatry, **42**, 475–488.
Biocca, S. (1995) The S-100; a protein family in search of a function, **46**, 71–82.
Bishop, G.A. (1992) Peptides in cerebellar circuits, **39**, 423–442.
Bishop, G.A. (1992) The physiological effects of peptides and serotonin on Purkinje cell activity, **39**, 475–492.
Bjartmar, C. (1993) Myelinated nerve fibres in the CNS, **40**, 319–384.
Blackburn, J.R. (1992) Dopamine functions in appetitive and defensive behaviours, **39**, 247–279.
Blackshaw, S. (1994) cDNA libraries from a few neural cells, **42**, 339–346.
Blackshaw, S. (1994) Cellular and molecular approaches to neural repair in the medicinal leech, **42**, 333–338.
Bland, B. H. (1986) The physiology and pharmacology of hippocampal formation theta rhythms, **26**, 1–54.
Bland, B.H. (1993) Extrinsic and intrinsic properties underlying oscillation and synchrony in limbic cortex, **41**, 157–208.
Blessing, W.W. (1994) Transneuronal labelling of CNS neurons with Herpes simplex virus, **44**, 37–53.
Bloch-Gallego, E. (1994) Neurotrophic activity of a homeobox peptide, **42**, 309–311.
Bolanowski, S. (1994) The structure and function of Pacinian corpuscles; a review, **42**, 79–128.
Bon, S. (1993) Molecular and cellular biology of cholinesterases, **41**, 31–91.
Bonanno, G. (1994) Release regulating presynaptic heterocarriers, **44**, 451–462.
Bondy, S.C. (1992) Oxidative damage and cerebral aging, **38**, 601–609.
Bontemps, F. (1992) The purine nucleotide cycle and its molecular defects, **39**, 547–561.
Borison, H.L. (1989) Area Postrema: Chemoreceptor circumventricular organ of the medulla oblongata, **32**, 351–390.
Bourque, C.W. (1991) Neurophysiology and neuropharmacology of hypothalamic magnocellular neurons secreting vasopressin and oxytocin, **36**, 131–169.
Bowe, C.M. (1994) Myelination and myelin sheath remodelling in normal and pathological PNS nerve fibres, **43**, 85–141.
Bowen, D.M. (1992) Animal and drug modelling for Alzheimer synaptic pathology, **39**, 517–545.
Boyan, G.S. (1990) Neuronal organization and information processing in the wind-sensitive cercal receptor/giant interneurone system of the locust and other orthopteroid insects, **35**, 217–243.
Boyan, G.S. (1993) The grasshopper, Drosophila and neuronal homology (advantages of the insect nervous system for the neuroscientist), **41**, 657–682.
Braak, E. (1985) Golgi preparations as a tool in neuropathology with particular reference to investigations of the human telencephalic cortex, **25**, 93–140.
Braak, H. (1985) Golgi preparations as a tool in neuropathology with particular reference to investigations of the human telencephalic cortex, **25**, 93–140.
Bradford, H.F. (1995) Glutamate, GABA and Epilepsy, **47**, 477–511.
Bradwejn, J. (1995) Biochemical, neurochemical, anatomical and electrophysiological correlates of panic disorder; multiple transmitter interaction and neuropeptide colocalization, **47**, 371–423.
Breakefield, X. O. (1985) Molecular genetic approaches to neurologic and psychiatric diseases, **24**, 95–140.
Brene, S. (1993) CCK peptides and mRNA in the human brain, **40**, 671–690.
Bristol, D.C. (1988) Development of ventral spinal motoneurone fibres: A correlative study of the growth and maturation of central and peripheral segments of fibre classes, **31**, 199–239.
Brook, F.A. (1990) The embryonic development of mammalian neural tube defects, **35**, 363–403.
Brunner, D. (1994) Genetic dissection of signal transduction mediated by the sevenless receptor tyrosine kinase in Drosophila, **42**, 287–292.
Buchanan, S.L. (1991) Classical (Pavlovian) conditioning models of age-related changes in associative learning and their neurobiological substrates, **36**, 201–228.
Buisseret-Delmas, C. (1993) The cerebellar olivo-corticonuclear connections in the rat, **40**, 63–87.
Burnashev, N. (1994) Molecular biology of glutamate receptors, **42**, 353–357.
Burton, N.R. (1988) NMDA receptors and ligands in the vertebrate CNS, **30**, 333–368.
Butler, E.G. (1995) The role of the cerebello-thalamo-cortical pathway in skilled movement, **46**, 199–213.
Butterworth, R.F. (1992) Effect of ammonium ions on synaptic transmission in the mammalian central nervous system, **39**, 135–153.

Calissano, P. (1995) The S-100; a protein family in search of a function, **46**, 71–82.
Campbell, J.N. (1992) Peripheral and central mechanisms of cutaneous hyperalgesia, **38**, 397–421.
Cancalon, P. (1985) Influence of temperature on various mechanisms associated with neuronal growth and nerve regeneration, **25**, 27–92.
Cangiano, C. (1987) Amino acids and hepatic encephalopathy, **28**, 277–302.
Cardelli-Cangiano, P. (1987) Amino acids and hepatic encephalopathy, **28**, 277–302.
Carlton, J. (1986) Neurobiology of an anorectic drug fenfluramine, **27**, 13–62.
Cascino, A. (1987) Amino acids and hepatic encephalopathy, **28**, 277–302.
Cavaletti, G. Ultrastructural organization of lamina VI of the spinal cord of the cat, **24**, 292–332.
Cavazzuti, M. (1993) Spatial and temporal aspects of spinal cord and brainstem activation in the formalin pain model, **41**, 565–607.
Ceci, F. (1987) Amino acids and hepatic encephalopathy, **28**, 277–302.
Chemnitius, J.M. (1987) Neurotoxicant sensitive esterase, enzymology and pathophysiology of organophosphorus ester-induced delayed neuropathy, **29**, 193–218.
Chen, G. (1995) Use of voltage sensitive dyes and optical recordings in the central nervous system, **46**, 463–506.
Chesler, M. (1990) The regulation and modulation of pH in the nervous system, **34**, 401–428.
Choi, B.H. (1989) The effects of methylmercury on the developing brain, **32**, 447–470.
Chowen, J.A. (1994) Gonadal hormones as promoters of structural synaptic plasticity of cellular mechanisms, **44**, 279–307.
Cockroft, D.L. (1990) The embryonic development of mammalian neural tube defects, **35**, 363–403.
Cohen, R.S. (1992) Ventromedial hypothalamic neurons in the mediation of long-lasting effects of estrogen on lordosis behavior, **38**, 423–453.
Collier, T.J. (1994) Neural graft augmentation through co-grafting implantation of cells as sources of survival and growth factors, **44**, 309–331.
Colom, L.V. (1993) Extrinsic and intrinsic properties underlying oscillation and synchrony in limbic cortex, **41**, 157–208.
Compston, D.A.S. (1994) The pathogenesis of demyelinating disease, **43**, 143–173.
Cooper, D.N. (1988) Down's syndrome and the molecular biology of chromosome 21, **30**, 507–530.
Cooper, J.D. (1993) Central neuroanatomical organisation of the rat visuomotor system, **41**, 209–279.
Copp, A.J. (1990) The embryonic development of mammalian neural tube defects, **35**, 363–403.
Cortelli, P. (1995) The concept of trophic units in the central nervous system, **46**, 561–574.
Cotariu, D. (1990) Neurophysiolgical and biochemical changes evoked by valproic acid in the Central Nervous System, **34**, 343–354.
Cote, P.Y. (1995) Chemical anatomy of primate basal ganglia, **46**, 131–197.
Coulon, J.-F. (1985) Octopamine in invertebrates and vertebrates, A review, **24**, 141–186.
Coyle, J.T. (1995) N-acetylaspartate in neuropsychiatric disorders, **46**, 531–540.
Creutz, C.E. (1994) Secretory and synaptic vesicle membrane proteins and their possible roles in regulated exocytosis, **43**, 511–536.
Cross, A.J. (1994) The neuroprotective actions of chlormethiazole, **44**, 463–484.
Cummings, S.L. (1992) Peptides in cerebellar circuits, **39**, 423–442.
Czech, K.A. (1995) Update on cellular transplantation into the CNS as a novel therapy for chronic pain, **46**, 507–529.

Da Silva, F.H.L. (1994) Presynaptic plasticity: The regulation of Ca-dependent transmitter release, **42**, 539–574.
Da Silva, F.H.L. (1994) The nucleus accumbens as a complex of functionally distinct neuronal ensembles: An integration of behavioural, electrophysiological and anatomical data, **42**, 719–761.
Dambly-Chaudiere, C. (1994) Position-reading and the emergence of sense organ precursors in Drosophila, **42**, 293–297.
Damer, C.K. (1994) Secretory and synaptic vesicle membrane proteins and their possible roles in regulated exocytosis, **43**, 511–536.
Dampney, R.A.L. (1994) The subretrofacial vasomotor nucleus: Anatomical, chemical and pharmacological properties and role in cardiovascular regulation, **42**, 197–277.
Danbolt, N.C. (1994) The high affinity uptake systems for excitatory amino acids in the brain, **44**, 377–396.
Darlington, C.L. (1995) In vitro electrophysiological studies of the vestibular nucleus complex, **45**, 335–346.
Dascombe, M. J. (1985) The pharmacology of fever, **25**, 327–373.
David, J.-C. (1985) Octopamine in invertebrates and vertebrates, A review, **24**, 141–186.
Davies, J.A. (1994) cDNA libraries from a few neural cells, **42**, 339–346.
Davies, R.W. (1994) Life and death in the nervous system, **42**, 283–285.
Davies, R.W. (1994) Reverse genetics of the mouse CNS: Targeted genetic analysis of the neuropeptide function and reverse genetic screens for genes involved in human neurodegenerative disease, **42**, 319–331.
Dawson, R.M. (1991) Tacrine: A pharmacological review, **36**, 257–277.
De Kloet, E.R. (1994) Mineralocorticoid and glucocorticoid receptors in the brain. Implications for ion permeability and transmitter system, **43**, 1–36.
De Vasconcelos, A.P. (1993) Glucose and ketone body utilization by the brain of neonatal rats, **40**, 163–221.
Dechant, G. (1994) Neurotrophin receptors, **42**, 347–352.
DeFelipe, J. (1992) The pyramidal neuron of the cerebral cortex: Morphological and chemical characteristics of the synaptic inputs, **39**, 563–607.
Del Corral, J.M. (1990) Stereotaxic atlas for the Lizard Gallotia galloti, **34**, 185–196.
Del Rio, J.A. (1992) Cell death and removal in the cerebral cortex during development, **39**, 1–43.
Denney, R.M. (1994) Monoamine oxidase: Distribution in the cat brain studied by enzyme- and immunohistochemistry: Recent progress, **42**, 53–78.
Dennis, B.J. (1993) Investigations on the

periaqueductal gray (PAG) of the rabbit: With consideration of experimental procedures and functional roles of the PAG, **41**, 403–434.
Depaulis, A. (1994) Endogenous control of epilepsy: The nigral inhibitory system, **42**, 33–52.
Detoledo-Morrell, L. (1995) Hippocampal markers of age-related memory dysfunction; behavioral, electrophysiological and morphological perspectives, **45**, 233–252.
Di Porzio, U. (1988) Evolution of neurotransmitter receptor systems, **30**, 105–170.
Diadori, P. (1988) Specificity of connections in the ventroposterior nuclei of the thalamus, **30**, 87–104.
Diamond, D. M. (1987) Physiological plasticity in auditory cortex: Rapid induction by learning, **29**, 1–56.
Dickey, W. (1990) Drug-induced neurological disorders, **34**, 331–342.
Dickey, W. (1991) The neuroleptic malignant syndrome, **36**, 425–436.
Dickson, B. (1994) Genetic dissection of signal transduction mediated by the sevenless receptor tyrosine kinase in Drosophila, **42**, 287–292.
Dieringer, N. (1995) Vestibular compensation; neural plasticity and its relations to functional recovery after labyrinthine lesions in frogs and other vertebrates, **46**, 97–129.
Ding, Z-Q. (1994) Transneuronal labelling of CNS neurons with Herpes simplex virus, **44**, 37–53.
Dragunow, M. (1988) Purinergic mechanisms in epilepsy, **31**, 85–108.

SUBJECT INDEX
VOLUMES 25–47 (1985–1995)

A3 (1986) **26**, 179–210
ACh (1992) **38**, 203–230
ACh release (1986) **26**, 55–92
AChEs (1989) **32** 423–446
AChR (1985) **25**, 297–326
ACTH modulation of nerve development (1989) **33**, 45–85
activation of renshaw cells (1990) **35**, 135–179
active immobility responses (1989) **32**, 403–422
activity patterns (1991) **37**, 365–382
activity-dependent interactions (1993) **41**, 93–129
N-acetylaspartate in neuropsychiatric disorders (1995) **46**, 531–540
adaptive behavioural responses (1993) **40**, 631–644
adaptive responses (1993) **41**, 723–791
adenosine (1991) **36**, 329–341; (1986) **27**, 319–350
adenosine and ATP in synaptic transmission (1993) **41**, 125–156
adenosine receptors (1986) **26**, 179–210
adrenocortical-hypothalamo-pituitary axis (1995) **45**, 129–141
age-related changes in learning (1991) **36**, 201–228
age-related memory dysfunction (1995) **45**, 233–252
ageing on the motor unit (1995) **45**, 397–458
aggression and flight in the cat (1988) **31** 261–284
aging (1992) **38**, 601–609; (1993) **41**, 369–401
alcohols (1994) **42**, 611–683
allogeneic nerve grafts (1990) **34**, 1–38
allograft (1994) **43**, 187–233
alpha-2-adrenoceptor agonists (1993) **40**, 691–709
aluminium toxic effects (1993) **40**, 89–121
Alzheimer synaptic pathology (1992) **39**, 517–545
amino acid neurotransmitters (1992) **38**, 57–91
amino acids (1987) **28**, 277–302
ammonium ions (1992) **39**, 135–153
amnesia (1985) **25**, 189–288
amphibian sympathetic ganglia (1994) **43**, 439–510
amygdala role in learning (1995) **46**, 401–422
anaesthetics (1988) **30**, 271–308
anatomic asymmetry (1992) **39**, 507–515
angiotensin (1993) **41**, 473–507
angiotensin II receptors (1990) **34**, 355–386
angiotensin II responsiveness in birds (1992) **39**, 179–207
anticholinesterase compounds (1987) **28**, 97–130
antihypertensive drugs /cerebral blood flow (1990) **35**, 75–83
antinociception (1993) **40**, 691–709
antinociception opioids (1986) **26**, 119–146
antioxidant therapy in Parkinson's disease (1996), **48**, 1–19
anxiety disorders (1989) **32**, 391–402
AP-1 proteins (1995) **47**, 257–290
apoptosis in the developing CNS (1995) **47**, 135–155
appetitive and defensive behaviours (1992) **39**, 247–279
arachidonic acid (1994) **43**, 175–186; (1995) **46**, 607–636
area postrema (1989) **32**, 351–390
arterial baroreceptor reflex (1990) **35**, 331–361
arthropod eye design (1993) **40**, 413–461
artificial neural networks (1991) **37**, 383–431
ascorbate release (1994) **43**, 537–565
associative learning (1991) **36**, 201–228
astrocyte glial cultures (1990) **34**, 355–386
astrocytes (1993) **40**, 477–506
astroglia (1988) **30**, 369–398
asymmetries of posture and locomotion (1991) **36**, 229–256
asymmetries (1993) **40**, 249–276
ATP and NA as sympathetic cotransmitters (1995) **47**, 45–94
ATP at developing neuromuscular junctions (1995) **47**, 31–44
ATP in synaptic transmission (1993) **41**, 125–156
ATP-sensitive K channel (1993) **41**, 21–30
attention deficit disorder (1987) **29**, 365–392
audition (1993) **41**, 345–367
auditory cortex (1987) **29**, 1–56
auditory evoked potential (1988) **31**, 19–46; (1995) **47**, 95–103
auditory input (1995) **47**, 105–133
auditory pathway (1993) **41**, 345–367
automatic movements in animals (1992) **39**, 45–112
axon terminal (1992) **39**, 443–474
axonal guidance of spinal interneurons (1994) **44**, 249–278
axons and glia in crayfish and squid (1994) **44**, 333–376
axotomy-induced alterations in electrophysiology (1990) **35**, 1–51

baclofen (1995) **46**, 423–462
barrel cortex neurons (1992) **39**, 389–422
basal ganglia (1995) **46**, 131–197
behavioral disorders (1994) **42**, 685–702
behavioural effects of ethanol (1991) **36**, 171–194
benzodiazepine agonist-inverse agonist (1988) **31**, 425–476
benzodiazepine receptor ligands (1988) **31**, 349–424; (1993) **40**, 1–61
bio-electric fields (1988) **30**, 449–468
biomagnetism (1994) **44**, 517–601
bird (1994) **43**, 281–322; (1994) **42**, 449–473
blood-brain barrier (1994) **43**, 235–279
blood-nerve barrier (1987) **28**, 303–344
bombesins (1993) **41**, 473–507
botulinum neurotoxin poisoning (1985) **46**, 83–96
bradykinins (1993) **41**, 473–507
brain activity patterns (1991) **37**, 365–382
brain damage (1989) **32**, 235–276
brain development in dwarf mice (1988) **31**, 149–170
brain energy metabolism / sleep (1995) **45**, 347–360
brain slices (1992) **38**, 455–482; (1993) **40**, 123–161
brain slices pitfalls (1988) **31**, 1–18
brain-derived neurotrophic factor (1994) **44**, 497–516
brainstem activation in pain (1993) **41**, 565–607
brainstem and auditory evoked potentials (1995) **47**, 95–103

caerulins (1993) **41**, 473–507
CGRP co-transmitters (1995) **45**, 1–98
calcitonin gene-related peptide (1989) **33**, 335–386
Ca homeostasis (1991), **37**, 255–285
Ca–dependent transmitter release (1994) **42**, 539–574
calcium (1986) **26**, 179–210
calcium and neurotransmitter release (1989) **32**, 1–9

calcium in synaptic modification (1988) **31**, 507–528
calcium mobilization and desensitization (1992) **39**, 295–336
calcium regulation (1987) **29**, 321–364
calcium-independent release (1992) **38**, 57–91
calmodulin (1987) **29**, 321–364
cardiac muscarinic K channels (1992) **39**, 229–246
cardiovascular and pain regulatory systems (1993) **40**, 631–644
cardiovascular control in NTS (1996) **48**, 21–53
cardiovascular effects (1986) **27**, 319–350
cardiovascular regulation (1994) **42**, 197–277
carp retina in neurobiology (1991) **37**, 287–327
cataplexy (1993) **41**, 533–541
catecholaminergic activity (1987) **29**, 365–392
CCK in regulation of food intake (1991) **36**, 23–34
CCK peptides in the human brain (1993) **40**, 671–690
cDNA libraries from few neural cells (1994) **42**, 339–346
cell death and removal (1992) **39**, 1–43
cell death (1988) **31**, 331–347
cell number (1989) **32**, 207–234
cellular transplantation and chronic pain (1995) **46**, 507–529
central mechanisms of cutaneous hyperalgesia (1992) **38**, 397–421
central synaptic transmission (1991) **36**, 391–423
cercal receptor/giant interneurone in locust (1990) **35**, 217–243
cerebellar circuits (1992) **39**, 423–442
cerebellar olivo-corticonuclear connections (1993) **40**, 63–87
cerebello-thalamo-cortical pathway in skilled movement (1995) **46**, 199–213
cerebellum (1991) **36**, 309–327; (1991), **36**, 437–463; (1991) **37**, 329–363; (1994) **42**, 161–196
cerebral aging (1992) **38**, 601–609
cerebral blood flow regulation (1990) **35**, 75–83
cerebral cortex (1992) **39**, 1–43; (1992) **39**, 337–388
cerebral cortex and hippocampus (1988) **31**, 109–148
cerebrovascular innervation (1992) **38**, 483–510
chaotic dynamics (1991) **36**, 279–308
chemoreceptor circumventricular organ (1989) **32**, 351–390
chick embryo spinal cord (1994) **44**, 249–278
chick spinal cord (1992) **38**, 93–123
chlormethiazole (1994) **44**, 463–484
cholinergic and peptidergic systems (1988) **31**, 109–148
cholinergic systems (1986) **26**, 119–146
cholinergic systems in CNS (1986), **26**, 211–272
cholinergic systems in spinal cord (1991) **37**, 475–524
cholinesterase in pathological states (1988) **31**, 311–330
cholinesterases (1993), **41**, 31–91
chromosome 21 (1988) **30**, 507–530
chronic pain (1995) **46**, 507–529
circadian rhythm of 5HT binding (1990) **35**, 405–428
circadian rhythms (1987) **29**, 219–260; (1993) **41**, 647–655
cisDDP (1994) **42**, 161–196
Clarke's column (1991) **36**, 391–423
climbing fibre-Purkinje cell system (1995) **47**, 341–369
CNS organization and the sympathetic nervous system (1995) **47**, 157–233
CNS-PNS transitional zone of the rat (1992) **38**, 261–316
co-localization (1991), **36**, 1–21; (1995) **47**, 371–423
coagonist (1990) **35**, 53–74
cochlea-chemical synaptic transmission (1995) **47**, 449–476
cochlea (1994) **42**, 703–717
cochlear hair cells (1992) **39**, 493–505
cochlear neurons (1990) **34**, 91–106
cochlear physiology (1985) **24**, 1–42
cognition (1994) **43**, 363–379
complex partial seizures (1992) **38**, 317–334
complex-cell receptive field models (1988) **31**, 285–310
computers; can they think? (1995), **45**, 99–127
conditioned associative learning (1995) **46**, 401–422
conditioning models of learning (1991) **36**, 201–228
control of cell number (1989) **32**, 207–234
control of head and eye movement (1993) **41**, 435–472
corticospinal projection (1992) **38**, 169–202
corticosteroid feedback effects (1995) **45**, 129–141
corticotropin-releasing hormone neurosecretory system (1993) **40**, 573–629
cultured explants of the nervous system (1991) **37**, 525–546
cultures (1988) **30**, 369–398
cultures of neurones and astrocytes (1990) **34**, 355–386
cutaneous hyperalgesia (1992) **38**, 397–421
cysteine sulphinate an EAA transmitter (1990) **35**, 313–323
cytoplasmic structure of the axon terminal (1992) **39**, 443–474

D-1 receptor (1990) **34**, 143–182
death in the nervous system (1994) **42**, 283–285
decerebrate cats (1987) **28**, 161–196
defensive behaviours (1992) **39**, 247–279
demyelinated axons (1989) **32**, 159–179
demyelinating disease (1994) **43**, 143–173
demyelination in myelin sheath (1992) **38**, 511–521
dendrite equation (1990) **34**, 91–106
dendritic spines (1988) **31**, 507–528; (1993) **41**, 281–321
depletion of striatal dopamine (1991) **36**, 229–256
2-deoxyglucose uptake (1991) **37**, 365–382
deprenyl (1994) **44**, 141–161
depression (1985) **24**, 187–198
dermatomyositis (1990) **35**, 181–193
descending control in man (1987) **28**, 345–376
desensitization (1992) **38**, 19–33; (1992) **39**, 295–336
development of cerebral cortex (1992) **39**, 1–43
development of serotoninergic system (1992) **38**, 93–123
development of the cerebellum (1991) **37**, 329–363
development of ventral spinal motoneurone fibres (1988) **31**, 199–240
development (1994) **43**, 281–322
dopamine (1992) **39**, 247–279
dopamine agonists (1991) **36**, 229–256
dopamine receptors (1990) **34**, 143–182
dopamine release (1988) **30**, 193–208
dopamine uptake (1990) **34**, 387–400
dopaminergic neural grafts (1994) **44**, 1–35
dopaminergic neurons (1994) **44**, 497–516
dopaminergic signals in the striatum (1994) **44**, 163–196
dopaminergic transmission (1994), **43** 537–565
dorsal horn (1993) **41**, 125–156; (1993) **41**, 609–645
dorsal root ganglion cells (1987) **29**, 393–410
dorsal spinocerebellar tract (DSCT) (1991) **36**, 391–423

dorsolateral septal nucleus (DLSN) (1995) **45**, 373–395
Down's syndrome (1988) **30**, 507–530
Drosophila (1993) **41**, 657–682; (1994) **42**, 287–292; (1994), **42**, 293–297
Drosophila brain structure (1994) **42**, 299–308
drug-induced neurological disorders (1990) **34**, 331–342
dystrophy (1988) **30**, 309–332

EAA cysteine sulphinate (CSA) (1990) **35**, 313–323
ear cytochemistry (1988) **30**, 209–270
EEG (1993) **41**, 369–401
EEG and odor response (1989) **33**, 387–398
electrically coupled/ chemically isolated synapses (1988) **31**, 507–528
electrochemical measurements in the CNS (1990) **35**, 297–311
encephalopathy (1987) **28**, 277–302
end-plate receptors (1992) **38**, 19–33
endocrine system (1987) **28**, 1–54
endogenous bimodal modulators (1992) **38, 379–395**
energy (1994) **43**, 37–71
enzyme- and immunohistochemistry (1994) **42**, 53–78
epilepsy (1994) **42**, 33–52. (also see seizures); (1985) **25**, 141–188; (1988) **31**, 85–108; (1995) **47**, 477–511
epilepsy model (1986) **26**, 1–12
equilibrium (1992) **38**, 35–56
estrogen on lordosis behavior (1992) **38**, 423–453
ethanol (1988) **31**, 171–198; (1991) **36**, 171–194
event-related potentials in normal aging (1993) **41**, 369–401
evolution of neurotransmitter receptor systems (1988) **30** 105–170
excitatory amino acid receptor ion channels (1994) **42**, 393–441
excitatory amino acid receptors (1992) **39**, 113–133
excitatory amino acids (1987) **28**, 197–276; (1993) **40**, 223–247; (1994) **44**, 377–396
excitoxic neurodegenerative disorders (1995) **47**, 257–290
exocytosis (1994) **43**, 511–536
eye movements (1987) **29**, 107–192

facilitation (1989) **32**, 1–9
feeding and metabolism (1987) **28**, 1–54
feeding and taste (1986) **27**, 293–318
female sex steroid hormones (1994) **44**, 55–86
fenfluramine (1986) **27**, 13–62
fever (1985) **25**, 327–3754
fibroblast growth factors (1993) **41**, 683–704; (1994) **44**, 497–516
firing properties of hippocampal neurons (1995) **45**, 253–274
food intake (1991) **36**, 23–34
formalin pain model (1993) **41**, 565–607
fractal dynamics (1991) **36**, 279–308
frog hearing (1990) **34**, 313–330
frog myelinated nerve (1994) **42**, 359–374
frog taste disc (1995) **46**, 351–399

G protein activation (1992), **39**, 229–246
GABA-A receptor channel function (1994) **42**, 489–537
GABA-A receptor (1992) **38**, 379–395
GABA and epilepsy (1995) **47**, 477–511
GABA from brain slices (1992) **38**, 455–482
GABA receptor mechanisms in CNS (1991) **36**, 35–92
GABA-B receptors (1995) **46**, 423–462
gain control (1989) **33**, 281–307
galanin-containing pathways (1993) **40**, 711–769
Gallotia galloti (1990) **34**, 185–196
Gaussian distributions of synaptic potentials (1995) **46**, 331–350
gene expression (1992) **38**, 523–569
gene expression in human brain (1990) **34**, 271–312
genetic basis of functional diversity (1993) **41**, 509–531
genetic dissection (1994) **42**, 287–292
genetics of Drosophila brain structure (1994) **42**, 299–308
geometry of the brain (1989) **32**, 137–158
giant interneurone system of the locust (1990) **35**, 217–243
glia in crayfish and squid (1994) **44**, 333–376
glial cells (1989) **33**, 309–333
glucocorticoid receptors (1994), **43**, 1–36
glucose uptake (1991), **37**, 365–382
glucose utilization (1993), **40**, 163–221
glutamate in mammalian brain (1990) **35**, 245–296
glutamate receptor (1988) **30**, 399–436; (1992) **39**, 295–336; (1994) **42**, 353–357
glutamate receptors; iontotropic and metabotropic (1996) **48**, 55–72
glutamate, GABA and epilepsy (1995) **47**, 477–511
glutamatergic transmission (1994) **43**, 537–565
glutaminergic signals in the striatum (1994), **44**, 163–196
glycine (1990), **35**, 53–74
Golgi preparations (1985), **25**, 93–140
grafting implantation of cells (1994) **44**, 309–331
grasshopper (1993) **41**, 657–682
growth and maturation (1988) **31**, 199–240
guanidinium toxins (1994) **42**, 359–374
gustatory organ (1995) **46**, 351–399
gustatory transduction in frog taste cells (1995), **46**, 239–287

head and eye movement (1993) **41**, 435–472
head movement (1991) **37**, 165–178
hepatic encephalopathy (1987) **28**, 277–302
Herpes simplex virus (1994) **44**, 37–53
hibernation problems (1993) **40**, 123–161
high affinity uptake systems for EAA (1994) **44**, 377–396
high pressure and anaesthetics (1988) **30**, 271–308
high resolution autoradiographic imaging (1991) **37**, 365–382
hippocampal neurons (1995) **45**, 253–274
hippocampal opioid peptides (1993) **40**, 507–528
hippocampal seizures (1991) **37**, 1–82
hippocampus age-related memory dysfunction (1995) **45**, 233–252
hippocampus — learning and memory (1994) **44**, 485–496
hippocampus (1988) **31**, 109–148; (1994) **42**, 575–609; (1995) **45**, 143–164
histamine (1988) **30**, 469–506
histaminergic neuron system (1994) **42**, 685–702
HIV associated dementia (1994) **42**, 475–488
Hoffman reflex (1987) **28**, 345–376
homeobox peptide (1994) **42**, 309–311
hormones & synaptic plasticity (1994) **44**, 279–307
human telencephalic cortex (1985) **25**, 93–140
5HT in the vertebrate nervous system (1990) **35**, 451–468
5HT (1992) **39**, 475–492
5HT binding in rat brain (1990) **35**, 405–428
5HT in chick CNS (1992) **38**, 93–123
hyperactivity (ADDH) (1987) **29**, 365–392
hypoglossal motoneurons (1993) **40**, 385–411

hypothalamic corticotropin-releasing hormone neurosecretory system (1993) **40**, 573–629
hypothalamic magnocellular neurons (1991) **36**, 131–169
hypothalamic neurons (1993) **41**, 323–344
hypothalamo-neurohypophysial system (1990) **34**, 437–504
hypothalamo-pituitary-adrenocortical axis (1995) **45**, 129–141
hypothalamus (1987) **28**, 1–54; (1989) **32**, 103–135; (1991) **37**, 1–17
hypothalamic supraoptic neurons (1995) **47**, 291–339
hypoxia (1994) **44**, 197–219

image analysis (1991) **37**, 433–473
immobility responses (1989) **32**, 403–422
immune systems (1993) **40**, 463–475
immune-neuro-link (1994) **42**, 475–488
immunocytochemistry (1991) **37**, 329–363
immunohistochemistry (1994) **42**, 53–78
immunoregulation (1989) **33**, 149–159
in situ hybridization (1990), **34**, 271–312
information processing (1990) **35, 217–243**
inhibitory amino acid receptor ion channels (1994), **42**, 393–441
inhibitory postsynaptic potentials (1993) **40**, 385–411
inhibitory synaptic transmission (1994) **42**, 575–609
initiation of locomotion (1986) **26**, 273–361; (1993) 323–344
insect AChEs (1989) **32**, 423–446
insect nervous system (1993) **41**, 657–682
insect visual system (1991) **37**, 179–254
insects CNS (1988) **30**, 1–86
insulin receptors (1991) **36**, 343–362
insulin-like growth factor-I (1994) **44**, 497–516
integration in oculomotor system (1992) **39**, 609–639
interleukin 1 (1994) **44**, 397–432
interleukin 2 (1993) **40**, 463–475
interleukin 6 (1994) **44**, 397–432
interneuronal relay (1992) **38**, 335–378
interneurone system of the locust (1990) **35**, 217–243
interstitial nucleus of Cajal (1987) **29**, 107–192
intrastriatal striatal transplants (1992) **38**, 611–639
ion channels (1994) **42**, 393–441; (1994) **43**, 175–186
ion microenvironment (1989), **33**, 309–333
ion transport mechanisms (1994) **42**, 703–717
ionic currents in cochlear hair cells (1992) **39**, 493–505
ions and energy (1994) **43**, 37–71
ischemia-induced neuronal damage (1993) **40**, 645–670
ischemic injury (1994) **42**, 441–448
isolated mammalian spinal cord (1995) **46**, 1–48
isolated preparations of the mammalian CNS (1986) **27**, 351–372

joints of the neck (1991) **37**, 165–178

K channels (1992) **39**, 229–246
K currents in motoneurones (1995) **47**, 513–531
kainic acid (1992) **38**, 317–334
kainic acid seizures (1994) **42**, 1–32
ketamine (1992) **38**, 571–600
ketone body utilization (1993) **40**, 163–221
kindling mechanisms (1986) **26**, 1–12
kinetic properties of neuronal nicotinic receptors (1993) **41**, 509–531

labyrinthine lesions (1995) **46**, 97–129
lamina VI (1985) **24**, 292–332
laminae I-III (1993) **41**, 609–645
lateral line system (1989) **32**, 181–206
lead exposure (1985) **24**, 199–232
learning (1987) **29**, 1–56; (1991) **36**, 201–228
learning in terrestrial snails (1993) **41**, 1–19
leech (1994) **42**, 333–338
lesions (1995) **47**, 257–290
life and death in the nervous system (1994) **42**, 283–285
limbic cortex (1993) **41**, 157–208
limbic structures (1992) **38**, 317–334
limbic system (1993) **41**, 723–791; (1995) **45**, 275–333
localization of classical transmitters (1993) **41**, 609–645
localization of neuropeptides (1993) **41**, 609–645
locomotion (1987) **28**, 161–196; (1991) **36**, 229–256
locomotion in the anesthetized rat (1993) **41**, 323–344
locomotion in the cat (1986) **26**, 273–361
locus coeruleus (1986) **27**, 183–194; (1990) **34**, 505–526
locust neuronal organization (1990) **35**, 217–243
long-term depression (1992) **39**, 209–228
long-term neuronal activity underlying behaviour (1995) **45**, 361–372
long-term potentiation (1990) **34**, 197–269; (1992) **39**, 209–228
lordosis behavior (1992) **38**, 423–453
luteinizing hormone release (1986) **26**, 147–178

macrophage (1994) **42**, 475–488
magnetic field detection in rodents (1990) **35**, 325–330
magnetic orientation (1994) **42**, 449–473
magnetoreception (1994) **42**, 449–473
mammalian thalamus (1996) **48**, 55–72
MAO-B inhibitors of psychiatric disporders (1994) **44**, 141–161
marmoset (1993) **41**, 345–367
maturation (1988) **31**, 199–240
medetomidine studies (1993) **40**, 691–709
medulla oblongata (1989) **32**, 351–390
medullary respiratory neurons (1990) **35**, 429–450
memory dysfunction (1995) **45**, 233–252
memory (1989) **32**, 277–349
mercury (1989) **32**, 447–470
mesencephalic arousal systems (1992) **39**, 155–178
metabolism (1987) **28**, 1–54; (1989) **33**, 135–147
methylmercury (1989) **32**, 447–470
microdialysis — theory and application (1990) **35**, 195–215
microenvironment of peripheral nerve (1987) **28**, 303–344
midbrain periaqueductal gray. (PAG) (1995) **46**, 575–605
mineralocorticoid receptors (1994) **43**, 1–36
modelling of neural circuitry (1986) **26**, 93–118
modular cerebellum (1991) **36**, 309–327
modulation (1994) **42**, 575–609
modulation of EAA receptor ion channels (1994) **42**, 393–441
modulation of ion channels (1992) **38**, 203–230; (1994) **43**, 175–186
molecular genetic approaches (1985) **24**, 95–140
molecular recognition and olfactory processing (1995) **45**, 585–619
monkey (1986) **27**, 195–250
monoamine oxidase (1994) **42**, 53–78

monoamine oxidases A and B (1994) **42**, 375–391
monoamine systems in the cerebral cortex. **36** 195–200
monosynaptic Ia EPSP (1988) **30**, 437–448
morphometric and stereological methods (1991) **37**, 525–546
motoneurones and muscles (1993) **41**, 93–129
motor innervation (1994), **43**, 323–362
motor unit (1993) **41**, 93–129; (1995) **45**, 397–458
movement (1992) **38**, 35–56
movements of head and eyes (1987), **29**, 107–192
MPTP-induced Parkinsonism (1990) **34**, 107–114
mRNA in the human brain (1993) **40**, 671–690
multiple sclerosis (1995) **47**, 425–448
multiple transmitter and neuropeptide colocalization (1995) **47**, 371–423
muscarinic K channels (1992) **39**, 229–246
muscle (1993) **41**, 705–721
muscle spindles (1993) **41**, 705–721; (1994) **43**, 323–362
muscles of the neck (1991) **37**, 165–178
muscular dystrophy (1988) **30**, 309–332
mutations (1994) **42**, 313–317
myelin proteins (1988) **31**, 241–260
myelin sheath remodelling (1994) **43**, 85–141
myelin sheath (1992) **38**, 511–521
myelinated nerve fibres in the CNS (1993) **40**, 319–384
myelination (1994) **43**, 85–141
myotonia (1994) **42**, 313–317
myotoxins (1995) **46**, 541–560

narcolepsy-cataplexy (1993) **41**, 533–541
neocortex (1992) **39**, 209–228
neonatal rats (1993) **40**, 163–221
nerve grafts (1990) **34**, 1–38
nerve guidance (1988) **30**, 449–468
nerve regeneration (1985) **25**, 27–92
nerve-muscle junction (1986) **27**, 251–292
neural graft augmentation (1994) **44**, 309–331
neural network analysis (1991) **37**, 287–327
neural networks (1991) **37**, 383–431; (1994) **42**, 229–281
neural plasticity labyrinthine lesions (1995) **46**, 97–129
neural regeneration in gastropod molluscs (1995) **46**, 289–330
neural repair (1994) **42**, 333–338
neural tube defects (1990) **35**, 363–403
neurite growth (1991) **37**, 525–546
neurochemical codes (1993) **41**, 723–791
neurochemical densities (1994) **44**, 233–247
neurodegenerative disease (1994) **42**, 319–331
neuroendocrine regulation (1989) **33**, 399–447
neuroendocrine systems (1993) **40**, 463–475
neurogenetic gradients (1987) **29**, 57–106
neuroimmunology (1994) **43**, 187–233
neuroleptic drugs (1990) **34**, 143–182
neuroleptic malignant syndrome (1991) **36**, 425–436
neurologic diseases (1985) **24**, 95–140
neurological disorders (1990) **34**, 331–342
neuromagnetic studies (1985) **24**, 233–256
neuromodulator (1993) **40**, 223–247; (1994) **43**, 537–565
neuromodulators in the insect visual system (1991) **37**, 179–254
neuromuscular junctions (1995), **47**, 31–44
neuromuscular system (1994) **42**, 313–317
neuromuscular topography (1988) **30**, 437–448
neuronal cultures (1990) **34**, 355–386
neuronal densities (1994) **44**, 233–247
neuronal differentiation (1994) **43**, 281–322
neuronal excitability (1985) **25**, 141–188
neuronal growth (1985) **25**, 27–92
neuronal homology (1993) **41**, 657–682
neuronal organization (1990) **35**, 217–243
neuronal survival (1991) **37**, 525–546
neuropathy (1987) **29**, 193–218
neuropeptide colocalization (1995) **47**, 371–423
neuropeptide function (1994) **42**, 319–331
neuropeptide Y (1992) **38**, 125–167
neuropeptide Y receptor subtypes (1992) **38**, 125–167
neuropeptides (1993) **41**, 609–645
neuropeptides in the primate brain (1992) **38**, 231–260
neuropsychiatric disorders (1995) **46**, 531–540
neurosecretory system (1993) **40**, 573–629
neurosteroids (1992) **38**, 379–395
neurotoxic/neurotrophic substance (1995) **46**, 607–636
neurotoxicant sensitive esterase (1987) **29**, 193–218
neurotransmitter actions (1992) **39**, 337–388
neurotransmitter co-localization (1991) **36**, 1–21
neurotransmitter receptor systems (1988) **30**, 105–170
neurotransmitter release (1989) **32**, 1–9
neurotransmitter (1992) **38**, 57–91; (1993) **41**, 609–645; (1993) **41**, 647–655; (1994) **42**, 129–160
neurotransmitters and neuromodulators (1993) **40**, 223–247
neurotransmitters in the insect visual system (1991) **37**, 179–254
neurotrophic activity (1993) **41**, 683–704; (1994) **42**, 309–311
neurotrophin receptors (1994) **42**, 347–352
nicotinic AChR (1985) **25**, 297–326
nicotinic receptors (1993) **41**, 509–531
nigral inhibitory system (1994) **42**, 33–52
nitric oxide (1994) **42**, 129–160
NMDA receptor/channel (1990) **35**, 53–74
NMDA receptors and ligands (1988) **30**, 333–368
non-synaptic interactions at presynaptic level (1991) **37**, 145–163
noradrenaline and ATP as sympathetic cotransmitters (1995) **47**, 45–94
norepinephrine (1988) **30**, 171–192
NMR studies of the brain (1994) **44**, 87–118
nucleus accumbens (1994) **42**, 719–761
nucleus tractus solitarius (1996) **48**, 21–53

oxygen deprivation (1993) **40**, 277–318
octopamine (1985) **24**, 141–186
oculomotor system (1992) **39**, 609–639
odor response (1989) **33**, 387–398
olfactory bulb (1987) **29**, 275–320; (1990) **34**, 115–142
olfactory system / old world monkey (1986) **27**, 195–250
olfactory processing (1995) **45**, 585–619
olfactory system (1995) **45**, 585–619
ontogenesis of the forebrain commissures (1993) **40**, 249–276
opioid neuropeptides (1989) **33**, 149–159
opioid peptides and seizures (1993) **40**, 507–528
opioids (1987) **28**, 131–160; (1993) **41**, 473–507
opioids and respiration (1989) **33**, 1–16
optical recordings (1995) **46**, 463–506
organophosphorus anticholinesterase compounds (1987) **28**, 97–130
organophosphorus ester-induced delayed neuropathy (1987) **29**, 193–218
orientation specificity (1994) **43**, 381–437

oscillation and synchrony in limbic cortex (1993) **41**, 157–208
outer hair cells (1994) **42**, 703–717
oxidative damage and cerebral aging (1992) **38**, 601–609
oxidative stress in Parkinson's disease (1996) **48**, 1–19
oxytocin (1991) **36**, 131–169

pain model (1993, 41, 565–607.
pain regulatory systems (1993) **40**, 631–644
panic disorder; multiple transmitter interaction (1995) **47**, 371–423
parahippocampal circuitry (1989) **33**, 161–253
parasympathetic ganglia (1995) **45**, 459–522
parasympathetic neurons (1994) **43**, 281–322
Parkinson's disease (1996) **48**, 1–19
Parkinsonism (1990) **34**, 107–114
patterns of anatomical connections (1987) **29**, 57–106
Pavlovian conditioning models (1991) **36**, 201–228
pedunculopontine nucleus (1991) **36**, 363–389
pedunculopontine nucleus-auditory input (1995) **47**, 105–133
pedunculopontine tegmental nucleus (1995) **47**, 1–29
penile erection (1995) **47**, 235–255
peptides (1992) **39**, 475–492; (1993) **41**, 473–507; (1994) **42** 309–311
peptides in cerebellar circuits (1992) **39**, 423–442
peptides in the limbic system (1993) **41**, 723–791
periaqueductal gray (PAG) of the rabbit (1993) **41**, 403–434
periaqueductal gray. (PAG) (1995) **46**, 575–605
perinatal rorganization of the innervation of muscle (1990) **34**, 39–90
periodic biological systems (1987) **29**, 261–274
peripheral nerve (1994) **433**, 187–233
perseverative behaviour (1994) **44**, 221–231
pH regulation in the CNS (1990) **34**, 401–428
phosphorylation of myelin proteins (1988) **31**, 241–260
pituitary-adrenocortical-hypothalamic axis (1995) **45**, 129–141
plasticity (1992) **39**, 389–422; (1993) **41**, 543–563
plasticity in auditory cortex (1987) **29**, 1–56
plasticity in the neocortex (1989) **32** 235–276
plasticity of the dendritic spine (1993) **41**, 281–321
plasticity of the locus coeruleus (1990) **34**, 505–526
plasticity of visual cortex (1988) **30**, 171–192
PNS nerve fibres (1994) **43**, 85–141
PNS-CNS transitional zone of the rat (1992) **38**, 261–316
polyamine biosynthesis (1985) **25**, 289–296
polyamines (1995) **47**, 545–563
polymyositis (1990) **35**, 181–193
position-reading (1994) **42**, 293–297

surface-active compounds (1994) **42**, 611–683
sympathetic cotransmitters (1995) **47**, 45–94
sympathetic ganglia (1994) **43**, 439–510
sympathetic nerve terminals (1988) **30**, 193–208
sympathetic nervous system (1995) **47**, 157–233
sympathetic neurones & hypoxia (1994) **44**, 197–219
sympathetic neurones (1994) **43**, 567–606
sympathetic preganglionic neuron (1988) **31**, 47–84
synaptic connections between medullary respiratory neurons (1990) **35**, 429–450
synaptic connections in slice cultures of rat hippocampus (1995) **45**, 143–164
synaptic densities (1994) **44**, 233–247
synaptic function (1990) **35**, 85–133
synaptic maturation (1988) **31**, 171–198
synaptic modification (1988) **31**, 507–528
synaptic organization (1990) **34**, 115–142
synaptic plasticity (1994) **44**, 279–307
synaptic transmission (1985) **24**, 43–94; (1992) **39**, 135–153
synaptic transmission in the spinal dorsal horn (1993) **41**, 125–156
synaptic vesicle membrane proteins (1994) **43**, 511–536
synchrony in limbic cortex (1993) **41**, 157–208

tachykinins (1993) **41**, 473–507; (1995) **45**, 1–98.
tacrine (1991) **36**, 257–277.
tardive dyskinesia (1992) **38**, 571–600
taste cells (1995) **46**, 239–287
taste (1986) **27**, 293–318
taurine from brain slices (1992) **38**, 455–482
taurine in the CNS (1989) **32**, 471–533
teeth and tooth nerves (1995) **45**, 165–222
telencephalon anatomical connections (1987) **29**, 57–106
teleost fishes (1991) **37**, 329–363
temperature-sensitive neurons (1989) **32**, 103–135
temperature (1985) **25**, 27–92
tetanus and botulinum neurotoxin poisoning (1985) **46**, 83–96
thalamic arousal systems (1992) **39**, 155–178
thalamic reticular nucleus (1989) **32**, 77–102
thalamocortical activity (1992) **39**, 337–388
thalamus (1988) **30**, 87–104; (1992) **39**, 337–388
thermostats (1989) **32**, 103–135
theta rhythm (1995) **45**, 523–583; (1986) **26**, 1–54
thixotropy in skeletal muscle (1993) **41**, 705–721
thyroid receptors (1992) **39**, 281–294
toad skin peptides (1993) **41**, 473–507
topography (1988) **30**, 437–448
toxic effects of aluminium (1993) **40**, 89–121
transgenic animals & polyamines (1995) **47**, 545–563
transmitter circuits (1987) **28**, 55–96
transneuronal labelling of CNS neurons (1994) **44**, 37–53
transplants (1992) **38**, 611–639
transport blood-brain (1994) **43**, 235–279
trophic units in the CNS (1995) **46**, 561–574
tubular implants (1989) **33**, 87–134
tumor necrosis factor in the brain (1994) **44**, 397–432
tumors of human CNS (1985) **25**, 289–296
tyrosine kinase (1994) **42**, 287–292

urine storage mechanisms (1995) **46**, 215–237

V-9-M (1990) **34**, 429–436
valproic acid (1990) **34**, 343–354
vasomotor nucleus (1994) **42**, 197–277
vasopressin (1991) **36**, 131–169
vasopressin-releasing neurons of the hypothalamus (1991) **37**, 1–17
ventromedial hypothalamic neurons (1992) **38**, 423–453
ventroposterior nuclei of the thalamus (1988) **30**, 87–104
vestibular compensation (1995) **46**, 97–129
vestibular nucleus complex (1995) **45**, 335–346
visual cortex (1988) **30**, 171–192
visual cortical development and plasticity (1993) **41**, 543–563
visual feedback (1993) **41**, 435–472
visual pathways (1994) **43**, 381–437
visual system (1989) **32**, 207–234; (1991) **37**, 179–254
visual-vestibular interaction (1993) **41**, 435–472
visuomotor system (1993) **41**, 209–279
vitamin C (1994) **43**, 537–565
voltage sensitive dyes and optical recordings (1995) **46**, 463–506
voltage-gated sodium channels (1994) **42**, 359–374

Xenopus (1989) **32**, 181–206

zebrin II immunocytochemistry (1991) **37**, 329–363
zinc (1994) **42**, 393–441

AVAILABLE AT YOUR FINGERTIPS:

THE ELSEVIER SCIENCE CATALOGUE ON INTERNET

Features include:

ELSEVIER SCIENCE

Catalogue on INTERNET

- All the journals, with complete information about journal editors and editorial boards
- Listings of special issues and volumes
- Listings of recently published papers for many journals
- Complete descriptions and contents lists of book titles
- Clippings of independent reviews of published books
- Book series, dictionaries, reference works
- Electronic and CD-ROM products
- Full text search facilities
- Ordering facilities
- Print options
- Hypertext links
- Alerting facility for new & forthcoming publications
- Updated monthly

Receive Regular News of Elsevier 's Publications

Elsevier Science mails information on new and existing publications regularly.
If you would like to be added to the mailing list please send us your name and full mailing address, indicating your fields of interest:

ENGINEERING
Energy Sources & Technology, Civil & Structural Engineering,
Mechanical Engineering, Electrical & Electronic Engineering,
Systems & Control Engineering, Aeronautical & Aerospace Technology,
Materials Technology, Chemical Engineering

LIFE SCIENCES & MEDICINE
Biological Sciences (including biochemistry & molecular biology), Agriculture,
Veterinary Medicine, Immunology, Cancer Research, Pharmacology,
Neuroscience, Vision Science, Clinical Medicine

PHYSICAL SCIENCES
Computer Science, Physics, Chemistry, Mathematics, Earth Science,
Environmental Science, Materials Science, Space & Planetary Sciences

SOCIAL SCIENCE & HUMANITIES
Sociology, Women's Studies, Psychology, Education,
Political Science, Geography, Economics, Management & Business, Linguistics,
Information Science, Librarianship

You Benefit With Disk Submission

Elsevier Science encourages the submission of articles on disk. We want Authors to provide us with their final manuscripts directly from their computer or word processing systems, without the need to follow complicated instructions. If you submit electronic manuscripts, you will notice the benefits:

- **A speedier publication process**
- **A clearer set of proofs, with fewer errors**

  Providing electronic manuscripts will improve the delivery of proofs - delivery will be faster and more reliable. Also, without needing to rekey the text the possibility of introducing errors will be avoided
- **Inclusion in an electronic archive**

  Elsevier Science is committed to developing and maintaining electronic archives for all of its journals. This will provide the flexibility to take advantage of electronic media to disseminate the information published in our journals, including your article.

There are some basic points to be kept in mind and we do have certain preferences. However, with Elsevier's expertise and facilities it does not really matter on which computer or wordprocessing system your manuscript has been prepared.

Basic Points to Help Us

Delivery of Electronic Files
Disks must be clearly marked with the following information:

- **Operating system**
- **Disk format (e.g.DS/DD)**
- **Word Processor used, including version number (users of see later)**
- **Authors' names**
- **Short title of article**

Three printed copies of the final version of the manuscript should be submitted with the disk to the Journal Editor.
In the event of differences between disk and hardcopy, the hardcopy will be considered as the definitive version.

Preparing Electronic Text Files

Please follow the general instructions on style and arrangement and, inparticular, the reference style as given in Notes for Authors for the book or journal concerned. If you are contributing to a multi-author work, please consult the publisher or earlier volume for style conventions with respect to headings, reference citation, etc.

LaTeX/TeX

Authors wishing to submit their article as a LaTeX/TeX file should note the following:
Authors should ideally use the "Article" style or the Elsevier LaTeX package which is available via anonymous FTP from CTAN centres.
(Further details on TeX can be obtained from Martin Key or Sebastian Rahtz)

Host names:	**CTAN directory:**
ftp.dante.de	/tex-archive/macros/latex/contrib/supported/elsevier
ftp.tex.ac.uk	/tex-archive/macros/latex/contrib/supported/elsevier
ftp.shsu.edu	/tex-archive/macros/latex/contrib/supported/elsevier

Authors should not add their own macros

Preparing Electronic Graphic Files

Illustrations should be produced in the Macintosh environment if possible using the following software packages:
Adobe Illustrator, Aldus Freehand, Cricket Graph, Macdraw, Chemdraw, Corel Draw for PC
However we will accept any of the popular drawing programs for the Macintosh and PC.
Artwork should be drawn for finished size using a Times or Helvetica typeface at a final size of 8pt type with appropriate lineweights.
Please indicate format, operating system, program and version number of the software used. If possible also print a directory of filenames.
Scanned artwork should be saved to Tiff format for both line and halftone and scanned at a suggested setting of 400 dpi for half-tones and 1000 dpi for linework. If it is necessary to compress the scans please indicate the software used. It is essential that a hard copy print of the scans be included.
Illustrations should be logically named and saved as individual files to 3.5" disk or a SyQuest cartridge 44Mbyte or 88Mbyte. If 3.5" disks are not available to you, 5.25" disks are acceptable.
Please send a laser print of the artwork with the electronic file.
When submitting electronic colour images please indicate the file format and program used (including compression software).
Include a 4 colour machine or cromalin proof and check that all the separations (if provided) are colour identified.
